SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	02/12/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/531,535	Applicant(s) KATAYAMA ET AL.	
	Examiner Hoa Q. Pham	Art Unit 2877	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Drawings

1. Drawings filed on 4/15/05 have been accepted.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a. Claim 1, line 3, the term "may" does not provide a positive limitation.

b. Claim 4 recites the limitation "said CCD cameras" in line 3. There is insufficient antecedent basis for this limitation in the claim.

c. Claims 2-3, 5-7 are dependent from claim 1, therefore, inherit the deficiencies of the claim 1.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2, 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Nichani (6,134,343) (of record).

Regarding claims 1-2 and 7-9, Nichani discloses a system and method for detecting defects within semi-opaque enclosure comprises step of forming a plurality of images by a CCD camera (column 2, lines 45-62 and column 11, lines 12-13) by imaging a plurality of glass bottles as samples (figure 7A) wherein the samples contain defective glass bottles (abstract) and producing a reference image (template image) (column 4, lines 29-30) from the obtained plural images, a range of brightness when light is applied to non-defective glass bottle being specified in the reference image (column 3, lines 22-51).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 3-6 and 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nichani.

Nichani teaches "the template image is constructed by sampling a plurality of images each of which represents a scene of an item absent defects" (column 2, lines 46-48). Nichani does not explicitly teach that each scene is detected by different CCD camera; however, it would have been obvious to one having ordinary skill in the art at

the time the invention was made to use different CCD cameras for simultaneously detecting the different images of the bottle, thus increase the speed of the detection.

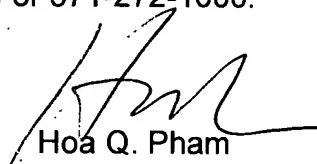

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nichani (5,987,159) discloses system for inspecting defects within a semi-opaque enclosure and Katayama et al (US 2006/0000968) discloses a bottle inspection device.
